SPA

MOTORI ASINCRONI TRIFASI AUTOFRENANTI CON ROTORE A GABBIA

**SERIE FE - COSTRUZIONE CHIUSA
VENTILAZIONE ESTERNA
GRANDEZZA 63 ÷ 280T**

I motori di questa serie risultano dall'accoppiamento di un motore asincrono trifase e di un gruppo freno elettromagnetico a disco.

Le caratteristiche di sicurezza, precisione, rapidità dell'arresto con tempo di inserzione e disinserzione dell'ordine di 5÷80 millisecondi li rendono adatti a molteplici applicazioni:

- Frenature di carichi o coppie agenti sull'albero motore.
- Frenature di masse rotanti allo scopo di eliminare tempi passivi.
- Frenature per aumentare la precisione della messa a punto.
- Frenature di parti di macchine in caso di pericolo nel rispetto della normativa antiinfortunistica.

I motori di questo catalogo sono disponibili in esecuzione UR-CSA per i mercati canadese e statunitense.

Per qualsiasi informazione o per problemi specifici contattare il nostro ufficio tecnico.

ASYNCHRONOUS THREE-PHASE BRAKE MOTORS WITH SQUIRREL CAGE ROTOR - FE SERIES ENCLOSED CONSTRUCTION - EXTERNALLY VENTILATED SIZES 63 ÷ 280T

The motors under this series result from coupling an asynchronous three-phase motor with an electromagnetic disc-brake unit.

Due to their safety and precision as well as their quick stop with a connection and disconnection time of a matter of 5 to 80 milliseconds they are suitable for a variety of applications such as:

- braking of loads or torques on the driving shaft
- braking of rotary masses in order to avoid any down-times
- braking to increase the set-up precision
- braking of machine parts in case of danger, in compliance with accident prevention rules.

The motors described in this catalogue are available in UR-CSA execution for the Canadian and US markets.

For any information or special question you can apply to our technical department.

DREHSTROM-ASYNCHRONMOTOREN MIT KÄFIGLÄUFER UND ANGEBAUTER BREMSE - TYPENREIHE FE GESCHLOSSENE AUSFÜHRUNG - OBERFLÄCHENKÜHLUNG BAUGRÖSSEN 63 ÷ 280T

Die Motoren dieser Baureihe bestehen aus einem Drehstrom Asynchronmotor und einer angebauten elektromagnetischen Drehstrom-Federdruck-Scheibenbremse. Sie zeichnen sich durch hohe Sicherheit und Einstellgenauigkeit sowie eine schnelle und präzise Bremsung bei minimalen Ein- und Ausschaltzeit von 5 ÷ 80 Millisekunden aus. Dadurch eignen sie sich für die verschiedensten Anwendungsfälle, wie z. B.

- Bremsung von, auf die Antriebswelle wirkenden, Lasten und Drehmomenten
- Bremsung umlaufender Massen zur Beseitigung unerwünschter Totzeiten
- Bremsung zur Optimierung der Einstellgenauigkeit
- Bremsung von Maschinenteilen in gefährlichen Situationen gemäß den geltenden Unfallverhütungsvorschriften.

Die in diesem Katalog beschriebenen Motoren sind in UR-CSA Ausführung lieferbar und für die kanadischen und US-amerikanischen Märkte bestimmt.

Für weitere Auskünfte oder spezifische Fragen wenden Sie sich bitte an unsere technische Abteilung.

I valori indicati si intendono per 20.000 ore di funzionamento a 50 Hz per accoppiamento diretto con direzione del carico fissa, assenza di urti o vibrazioni ai cuscinetti

The indicated values are specified for 20.000 working hours at 50 Hz cycles for direct coupling with fixed direction of load and without any shocks or vibrations on the bearings.

Die angegebenen Werte gelten für 20.000 Betriebsstunden bei 50 Hz bei Direktkupplung, fester Lastausrichtung und stoss- bzw. schwingungsarmer Lagerung.

I motori autofrenanti hanno tolleranza $\pm 6\%$ sulla tensione di alimentazione.

Brake motors have a $\pm 6\%$ tolerance on the supply voltage.

Die Bremsmotoren haben eine $\pm 6\%$ Toleranz auf der Speisespannung.

Die Bremsmotoren haben eine ±6% Toleranz auf der Speisespannung.

FRENO ELETTROMAGNETICO A DISCO

ELECTROMAGNETIC
DISC BRAKE

ELEKTROMAGNETISCHE
SCHEIBENBREMSE

PRINCIPALI CARATTERISTICHE

MAIN SPECIFICATIONS

HAUPTEIGENSCHAFTEN

PRINCIPIO DI FUNZIONAMENTO

- A) Quando il freno è alimentato, l'elettromagnete (8) vince la forza esercitata dalle molle (5), attira a sé il nucleo mobile (4) sblocca il disco freno (2) e permette all'albero motore di ruotare liberamente.
- B) Quando l'elettromagnete (8) non è alimentato, il nucleo mobile, sospinto dalle molle (5), agisce premendo sul disco freno (2) e blocca la rotazione dell'albero motore.

REGOLAZIONE DELLA COPPIA FRENANTE

La coppia frenante è proporzionale alla compressione delle molle (5) e varia agendo sui dadi autobloccanti (6); più le molle sono compresse e maggiore è la frenata.

REGOLAZIONE DEL TRAFERRO

Il traferro (9) è la distanza fra l'elettromagnete (8) e il nucleo mobile (4). E' consigliabile controllare periodicamente il traferro poiché, per l'usura delle guarnizioni del disco freno (2), esso tende ad aumentare. Per riportare il traferro al valore richiesto si agisce sui dadi (7). Per informazioni sulle misure di regolazione del traferro contattare il nostro ufficio tecnico.

OPERATING PRINCIPLE

- A) When brake is fed, the electromagnet (8) overcomes the strength exerted by the springs (5), attracts the moving core (4), releases the brake disc (2) and enables the motor shaft to rotate freely.
- B) When the electromagnet (8) is not fed, the moving core pushed by the springs (5) actuates on the brake disc (2) and stops the rotation of the driving shaft.

ADJUSTMENT OF THE BRAKING TORQUE

The braking torque is proportional to the compression of springs (5) and is varied by turning the self-locking nuts (6); the more springs are compressed, the greater the braking torque is.

ADJUSTMENT OF THE AIR GAP

The air gap (9) is the distance between electromagnet (8) and the moving core (4). It is recommended to check the air gap regularly, since due to wear of the packings of the brake disc (2) it tends to increase. Turn nuts (7) to bring the air gap to the required value. Pls. contact our technical department for information on the air gap adjustment values.

FUNKTIONSWEISE DER BREMSE

- A) Wird die Bremse vom Erregerstrom gespeist, überwindet der Elektromagnet (8) die von den Druckfedern (5) ausgeübte Kraft und zieht die bewegliche Ankerscheibe (4) an. Die Bremsscheibe (2) wird freigegeben und die Antriebswelle kann sich frei drehen.
- B) Im stromlosen Zustand, d.h. wenn der Elektromagnet (8) nicht gespeist wird, wird durch die Federkraft der Druckfeder (5) die bewegliche Ankerscheibe (4) gegen die Bremsscheibe (2) gepresst. Somit verhindert die Bremse die Rotation der Antriebswelle.

EINSTELLUNG DES BREMSMOMENTS

Das Bremsmoment ist proportional dem Druck der Federn (5); es lässt sich durch Drehen der selbstblockierenden Muttern (6) verändern. Je grösser der Federdruck; desto höher ist das übertragbare Bremsmoment (und desto stärker ist die Bremsung).

EINSTELLUNG DES LUFTSPALTS

Der Luftspalt (9), ist der Abstand zwischen Elektromagnet (8) und beweglicher Ankerscheibe (4). Es empfiehlt sich, die Einstellung des Luftspalts regelmässig zu überprüfen, da lange Laufzeiten oder extrem starke Belastungen eine Abarbeitung der Reibbeläge der Bremsscheibe zur Folge haben, wodurch sich der Luftspalt vergrößert. Um den Luftspalt wieder auf den erforderlichen Wert zu bringen, muß der Abstand durch Drehen der Einstellmutter (7) nachgestellt werden. Bitte wenden Sie sich an unsere Technische Abteilung für Angaben bez. die Werte der Luftspalteinstellung.

Technical features, dimensions as well as any other data in this catalogue are not prescriptive. ELECTRO ADDA S.p.A. reserves itself the right to change them in any time without giving any previous notice.

Die im Katalog aufgeführten technischen Daten, Masse und sonstigen Angaben sind unverbindlich. ELECTRO ADDA S.p.A. behält sich vor, sie zu jeder Zeit und ohne Vorankündigung zu ändern.

I motori autofrenanti hanno tolleranza $\pm 6\%$ sulla tensione di alimentazione.

Brake motors have a $\pm 6\%$ tolerance on the supply voltage.

Die Bremsmotoren haben eine $\pm 6\%$ Toleranz auf der Speisespannung.

PER LE ATTIVITA' ATTIVITA'
AND THE FOLLOWING ACTIVITIES

Progettazione, produzione ed assistenza di macchine elettriche a bassa tensione per il settore industriale, navale e civile, in particolare: motori asincroni a gabbia di rotore a girante, autotrasformatori con rotore a girante, motori con rotore a girante, autotrasformatori con rotore a girante ATEX, a motore a vapore, convertitori di frequenza, motori ad alta frequenza, motorie, tegole, circuiti, motori per navette.

Design, manufacturing and service of low voltage electric rotary machines for industrial, naval and civil field, in particular: asynchronous three-phase motors with squirrel cage rotor, brake motors with squirrel cage rotor, single phase motors with squirrel cage rotor, explosion-proof motors with squirrel cage rotor with ATEX certificate, slip-ring motors, frequency converters, high frequency motors, motors for circuit saws, motors for elevator duty.

Projetts og levering af elektriske maskiner og apparater til lavt spændingsniveau.

Projektering, produktion og assistens af elektriske maskiner og apparater til lavt spændingsniveau.

Product No. 101295 024734

Issued to: **ELECTRO ADDA SPA**
VIA NAZIONALE 5
I-20081 BRESCIA (C. ITALIA)

This is to certify that representative samples of **Motor Constructions for Three Phase Squirrel Cage**
have been tested and found to comply with the following UL and IEC standards:
UL 1004 - Electric Motors
CSA C22.2 No. 140.05 - Motors and Generators

These products conform to the UL and IEC standards listed above, and are recognized as complying with the applicable national and international standards.

Manufacture for Safety: **UL 1004 - Electric Motors**
CSA C22.2 No. 140.05 - Motors and Generators

Additional Information: See Report 101295

UL has performed the tests and found that the products comply with the applicable UL and IEC standards listed above, and are recognized as complying with the applicable national and international standards.

UL has performed the tests and found that the products comply with the applicable UL and IEC standards listed above, and are recognized as complying with the applicable national and international standards.

SUBMITTOR

The products listed below are eligible to bear the CSA Mark shown, with adjacent indicator "C" and "US".

Issued by: Ghislain Foulem, E.I.T.

Signature: 

PRODUCTS

CLASS 4211 01 - MOTORS AND GENERATORS
 CLASS 4211 81 - MOTORS AND GENERATORS - CERTIFIED TO U.S. STANDARDS

Three phase squirrel cage induction motors, permanently connected, 460Vac, 60 Hz, 1700-1750 rpm, Frame 56-400, Class F-155°C insulation, TEFC, 40°C ambient. Series HEM, 4 poles, 0.06-500 kW; Series RML 2 to 8 poles, 0.06-500kW.

APPLICABLE STANDARDS

- CAN/CSA-C22.2 No. 109-95 - Motors and Generators
- UL Std. No. 1004 (4th Edition) - Electric Motors

The "C" and "US" indicator adjacent to the CSA Mark signifies that the product has been evaluated to the applicable CAN/CSA, UL, and/or IEC standards of the U.S. and Canada. This includes products eligible to bear the NRTL indicator. NRTL, i.e. Nationally Recognized Testing Laboratory, is a designation granted by the U.S. Occupational Safety and Health Administration (OSHA) to laboratories which have been recognized to perform certification to U.S. Standards.

Supplement to Certificate of Compliance

Product Certification History

Project	Date	Description
2500004313	November 22, 1999	c CSA us Certification on squirrel cage induction motors, Series HEM and RM, frame size 56 to 400.

DICHIARAZIONE DI CONFORMITA'

Il Produttore :

Electro Adda S.p.A
Costruzioni Elettromeccaniche
Via Nazionale 8 23883 Beverate di Brivio

dichiara che i motori asincroni monofasi e trifasi altezze d'asse 56 + 500

sono realizzati in conformità alle seguenti normative internazionali :

IEC 34 (CEI EN 60034)

ed alle seguenti Direttive Europee :

- **Direttiva Bassa Tensione (LVD) 73/23/CE, modificata con 93/68/CE**
- **Direttiva Compatibilità Elettromagnetica (EMC) 89/336/CE**
- **Direttiva sulla limitazione dell'impiego di alcune sostanze pericolose nelle apparecchiature elettriche ed elettroniche (RoHS) 2002/95/CE**

I motori in oggetto sono inoltre conformi alla Direttiva "Machine" 98/37/CE, assumendo per questa che il componente motore non può essere messo in servizio prima che la macchina, in cui sarà incorporato, sia stata dichiarata conforme alle disposizioni della Direttiva. Nell'impiego del motore è necessario garantire il rispetto della norma EN 60204-1 e delle istruzioni di sicurezza e di installazione riportate nel manuale d'uso del produttore.

Beverate di Brivio

Electro Adda S.p.A.
Via Nazionale 8
23883 Beverate di Brivio (LC)

COMPLIANCE DECLARATION

The Manufacturer :

Electro Adda S.p.A
Costruzioni Elettromeccaniche
Via Nazionale 8 23883 Beverate di Brivio - Italy

Hereby declares that the asynchronous single-phase and three-phase motors sizes 56 + 500

are carried out in compliance with the following international standards :

IEC 34 (CEI EN 60034)

and to the following European Directives :

- **Low Voltage Directive (LVD) 73/23/EC, modified by the 93/68/EC**
- **Electromagnetic Compatibility Directive (EMC) 89/336/EC**
- **Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) 2002/95/EC**

The captioned motors are also in compliance with the "Machinery Directive" 98/37/EC, assuming for this, that the motor component may not be put into service before the machine in which it will be assembled, has been declared to be in compliance with the Directive provisions. When operating the motor, it is necessary to assure that the Standard EN 60204-1 and the installation and safety instructions of the manufacturer's operating handbook are observed.

Beverate di Brivio

KONFORMITÄTSERKLÄRUNG

Der Hersteller :

Electro Adda S.p.A
Costruzioni Elettromeccaniche
Via Nazionale 8 23883 Beverate di Brivio - Italien

erklärt dass die Einphasen- und Drehstromasynchronmotoren Achsenhöhe 56 + 500

nach den folgenden internationalen Normen :

IEC 34 (CEI EN 60034)

und den folgenden Europäischen Richtlinien :

- **Niederspannungsrichtlinie (LVD) 73/23/CE, durch 93/68/EG geändert**
- **Richtlinie Elektromagnetische Verträglichkeit (EMV) 89/336/EG**
- **Richtlinie zur Beschränkung der Verwendung bestimmter gefährlicher Stoffe in elektrischen und elektronischen Geräten (RoHS) 2002/95/EG** verwirklicht sind.

Außerdem entsprechen die oben angegebenen Motoren der "Maschinenrichtlinie" 98/37/EG, wobei wir annehmen dass die Inbetriebnahme vom Bestandteil Motor solange untersagt ist, bis erklärt wird dass die Maschine in die dieser Bestandteil eingebaut wird, den Vorgaben der Maschinenrichtlinie entspricht. Beim Gebrauch vom Motor ist es erforderlich zu gewährleisten dass die Norm EN 60204-1 und die Sicherheits- und Aufstellungsanweisungen beachtet werden, welche in den Betriebsanweisungen vom Hersteller beschrieben sind.

<p>2 CA Motori asincroni trifasi autofrenanti Costruzione chiusa - Ventilazione esterna Con freno elettromagnetico in corrente alternata Grandezze 63÷280 - Potenze 0.18-75 kW</p>	<p>2 CA Asynchronous three-phase brake motors Enclosed construction - Externally ventilated With alternate current electromagnetic brake Sizes 63 to 280 - Power 0,18 to 75 kW</p>	<p>2 CA Drehstrom-Asynchronmotoren mit angebaute Brems Geschlossene Ausführung - Oberflächenkühlung Mit elektromagnetischer Drehstrom - Federdruck - Scheibenbremse Baugröße 63 bis 280 Leistung 0,18 bis 75 kW</p>
<p>2 CC Motori asincroni trifasi autofrenanti Costruzione chiusa - Ventilazione esterna Con freno elettromagnetico in corrente continua Grandezze 63÷180 - Potenze 0.18-25 kW</p>	<p>2 CC Asynchronous three-phase brake motors Enclosed construction - Externally ventilated With direct current electromagnetic brake Sizes 63 to 180 - Power 0,18 to 25 kW</p>	<p>2 CC Drehstrom-Asynchronmotoren mit angebaute Brems Geschlossene Ausführung - Oberflächenkühlung Mit elektromagnetischer Gleichstrom - Einflächchen - Scheibenbremse Baugröße 63 bis 180 Leistung 0,18 bis 25 kW</p>
<p>2 CCH Motori asincroni trifasi autofrenanti Costruzione chiusa - Ventilazione esterna Con freno elettromagnetico in corrente continua ad alta coppia Grandezze 63÷112 - Potenze 0.18-5.5 kW</p>	<p>2 CCH Asynchronous three-phase brake motors Enclosed construction - Externally ventilated With direct current electromagnetic brake with high torque Sizes 63 to 112 - Power 0,18 to 5,5 kW</p>	<p>2 CCH Drehstrom-Asynchronmotoren mit angebaute Brems Geschlossene Ausführung - Oberflächenkühlung Mit elektromagnetischer Gleichstrom - Einflächchen - Scheibenbremse mit höherem Bremsmoment Baugröße 63 bis 112 Leistung 0,18 bis 5,5 kW</p>
<p>2 CCL Motori asincroni trifasi autofrenanti Costruzione chiusa - Ventilazione esterna Con freno elettromagnetico in corrente continua ad alta coppia e bassa rumorosità Grandezze 63÷280 - Potenze 0.18-75 kW</p>	<p>2 CCL Asynchronous three-phase brake motors Enclosed construction - Externally ventilated With direct current electromagnetic brake with high torque and low noise execution Sizes 63 to 280 - Power 0,18 to 75kW</p>	<p>2 CCL Drehstrom-Asynchronmotoren mit angebaute Brems Geschlossene Ausführung - Oberflächenkühlung Mit elektromagnetischer Gleichstrom - Einflächchen - Scheibenbremse mit höherem Bremsmoment und geräuscharmer Ausführung Baugröße 63 bis 280 Leistung 0,18 bis 75 kW</p>
<p>3 Motori asincroni monofasi con rotore a gabbia Costruzione chiusa - Ventilazione esterna Grandezze 56÷112 - Potenze 0.06-4 kW</p>	<p>3 Asynchronous single-phase motors with squirrel cage rotor Enclosed construction - Externally ventilated Sizes 56 to 112 - Power 0,06 to 4 kW</p>	<p>3 Einphasen-Wechselstrommotoren mit Käfigläufer Geschlossene Ausführung - Oberflächenkühlung Baugröße 56 bis 112 Leistung 0,06 bis 4 kW</p>
<p>4 Motori asincroni trifasi con rotore a gabbia antideflagranti - Serie PE-EEx d Costruzione chiusa - Ventilazione esterna Grandezze 71÷200 - Potenze 0.37-37 kW</p>	<p>4 Explosion-proof asynchronous three-phase motors with squirrel cage rotor - Series PE-EEx d Enclosed construction - Externally ventilated Sizes 71 to 200 - Power 0,37 to 37 kW</p>	<p>4 Drehstrom-Asynchronmotoren mit Käfigläufer Explosiongeschützt, druckfeste Kapselung Typenreihe PE-Eex d Geschlossene Ausführung - Oberflächenkühlung Baugröße 71 bis 200 Leistung 0,37 bis 37 kW</p>
<p>5 Motori asincroni trifasi con rotore avvolto Costruzione chiusa - Ventilazione esterna Grandezze 100÷500 - Potenze 0.75-530 kW</p>	<p>5 Asynchronous three-phase motors with wound rotor Enclosed construction - Externally ventilated Sizes 100 to 560 - Power 0,75 to 560 kW</p>	<p>5 Drehstrom-Asynchronmotoren mit Schleifringläufer Geschlossene Ausführung - Oberflächenkühlung Baugröße 100 bis 560 Leistung 0,75 bis 560 kW</p>
<p>6 Macchine ad alta frequenza ♦ Convertitori di frequenza asincroni trifasi Costruzione chiusa - Ventilazione esterna Grandezze 100÷355 - Potenze 0.5-110 KVA ◇ Motori ad alta frequenza Costruzione chiusa Costruzione chiusa e ventilata</p>	<p>6 High-Frequency Machines ♦ Asynchronous three-phase frequency converters Enclosed construction - Externally ventilated Sizes 100 to 355 - Power 0,5 to 110 kVA ◇ High-Frequency motors Enclosed construction Enclosed and ventilated construction</p>	<p>6 Hochfrequenzmaschinen ♦ Rotierende Drehstrom-Frequenzumformer Geschlossene Ausführung - Oberflächenkühlung Baugröße 100 bis 355 Leistung 0,5 bis 110 kVA ◇ Hochfrequenzmotoren Geschlossene Ausführung - Oberflächenkühlung</p>
<p>7 Costruzioni speciali 7 A Motori asincroni trifasi per seghe circolari Costruzione chiusa - Ventilazione esterna Grandezze 71-125 - Potenze 0.75-25.8 kW 7 B Motori asincroni trifasi con rotore a gabbia antishock Costruzione chiusa - Ventilazione esterna Esecuzione speciale antishock a norme M.M.I. Grandezze 71÷355 - Potenze 0.15-250 kW 7 C Altre costruzioni: Motori mandrino Motori mandrino con cambio utensile Variatori di tensione Rulli ruotanti Elettroventilatori Convertitori statici di frequenza</p>	<p>7 Special constructions 7 A Asynchronous three-phase motors for circular saws Enclosed construction - Externally ventilated Sizes 71 to 125 - Power 0,75 to 25,8 kW 7 B Asynchronous three-phase motors with shock-free cage rotor Enclosed construction - Externally ventilated Special shock-free design to Italian Navy standards Sizes 71 to 355 - Power 0,15 to 250 kW 7 C Other constructions Spindle motors Spindle motors with tool change Voltage changers Rotary rollers Electric fans Frequency inverters</p>	<p>7 Spezialanfertigungen 7 A Drehstrom-Flachmotoren (Spezialkreissägemotoren) in der Holz-, Kunststoff und Metallverarbeitung Geschlossene Ausführung - Oberflächenkühlung Baugröße 71 bis 125 - Leistung 0,75 bis 25,8 kW 7 B Drehstrom-Asynchronmotoren mit Käfigläufer schockfest Geschlossene Ausführung - Oberflächenkühlung Schockfeste Spezialausführung nach Normen der italienischen Kriegsmarine M.M.I. Baugröße 71 bis 355 - Leistung 0,15 bis 250 kW 7 C Andere Anfertigungen Spindelmotoren Spindelmotoren mit Werkzeugwechsel Spannungsregler Trommelmotoren/Aussenläufer Ventilatoren Statische Frequenzrichter</p>
